

Bespoke Film Scores, Immersive Audio Post- Production & Precision Mixing.

Crafting unique, strategic sonic identities
for film, media, and artists.

by Robin Hoffmann

In the modern media landscape, poor audio instantly signals amateur production, destroys viewer credibility, and leads to diminished returns on your content investment.

solidskillsy. is not just a sound studio. We are your **Strategic Audio Partner**, ensuring every whisper, score, and sound effect is tailored to **cinematic technical and emotional standards.**

1. FOR FILMMAKERS & CONTENT CREATORS

We provide end-to-end audio post-production that transforms your project from a good film or video into a professional cinematic experience:

- **Bespoke Composition & Scoring:** Crafting unique, strategically designed musical scores (from intimate pieces to grand orchestral works) to enhance emotional resonance and create a powerful sonic identity for your film.
- **Precision Dialogue Editing & ADR:** Clean, intelligible and nuanced speech that keeps your audience focused on the story.
- **Strategic Sound Design & Foley:** Building believable, story-enforcing, immersive worlds, from subtle room tone to massive explosions.
- **Final Re-recording Mix:** Expert balancing of Dialogue, Music, and FX to meet strict broadcast, Video On Demand and streaming standards, guaranteeing consistent volume and impact across platforms and consumer scenarios.
- **Delivery Formats:** Ready for the future, including Dolby Atmos and MPEG-H, as well as standard surround/stereo masters.

2. FOR PERFORMING ARTISTS

We bridge the gap between your performance and the world's listening systems, ensuring your music translates flawlessly from studio to streaming:

- **PhD-Driven Expertise:** A deep understanding of musical rhetoric, composition, and high-level musical performance informs every mixing decision.
- **Precision Mixing & Mastering:** Optimised rhetoric, clarity, and imaging that makes your tracks pop on vinyl, radio, and all digital platforms.
- **Bespoke Sonic Identity:** Crafting the unique character that defines your signature sound.

When you hire a musical and technical expert, you don't worry about the details.

ASK YOURSELF: *If your audio team isn't knowledgeable enough or doesn't care about both the conceptual and technical details, can they be trusted with your budget and your brand's credibility?*

LET'S TELL YOUR STORY TOGETHER.

Robin Rolfhamre, PhD
Founder, Composer and Chief Engineer
